Easy. Fast. Smart.

Zetafax for docSTAR

What we have here is the
ability to communicate better.

Zetafax for docSTAR is designed to meet all of your faxing needs. Whether fax is just a casual requirement or an integral part of your everyday workflow, it saves paper and toner, reduces steps, and makes faxing as easy as sending or receiving an email.

Zetafax for docSTAR

Easy. Fast. Smart:

- ★ **Easy** - Zetafax for docSTAR brings inbound and out bound faxing right to your docSTAR desktop. Sending faxes is as easy as printing or emailing a document, and receiving faxes is completely automatic—they just appear in your Inbox. There is no new software to learn.
- ★ **Fast** - Received faxes are routed to you; you don't have to go get them. Likewise, any time you need to send a fax, it just takes a couple of clicks. No time, paper, or toner are wasted printing a document and bringing it to the fax machine.
- ★ **Smart** - Intelligent features further save steps, time, and money. Here are just a few:
 - Automatic redial after busy signals, saves the trouble of checking and resending faxes manually.
 - Offpeak sending, reduces cost and line utilization during peak times.
 - Junk fax filtering, saves time and reduces aggravation.

Furthermore, use of Zetafax to capture and log faxes helps you comply with Sarbanes-Oxley and other regulations, which require systematic and consistent treatment of all corporate records.

Network Expansion Packages

Zetafax for docSTAR can be upgraded with the purchase of Zetafax network license packs and add-ons to meet your total faxing needs.

Any Windows Application

Give every user the ability to send faxes from any Windows application - not just docSTAR - saving the time and cost of printing and faxing the document. Users can also quickly create text message faxes through Zetafax client software. And, with the SMS Gateway add-on, they can send text messages to mobile phones.

Routing

Inbound faxes can be routed automatically based on:

- ★ Sender's station ID (a phone number or name configured in the sender's fax device)
- ★ Caller ID
- ★ Sub-addressing (available with T.30 fax devices)
- ★ DID – Direct inward dialing

Automatic routing saves effort and gets faxes where they need to be processed promptly.

Email and Office Integration

Zetafax's email gateway distributes faxes as emails through Microsoft Exchange Server or Lotus® Domino® right to your email client, saving time and eliminating the need to learn a new application.

MS-Office add-ons provide one click faxing from Microsoft Office applications.
